

The Portland Regional Transit Proposal, this is not the current government plan.

This is a general overview for the proposals to improve traffic problems in the Portland region.

Not all transit provisions are shown.

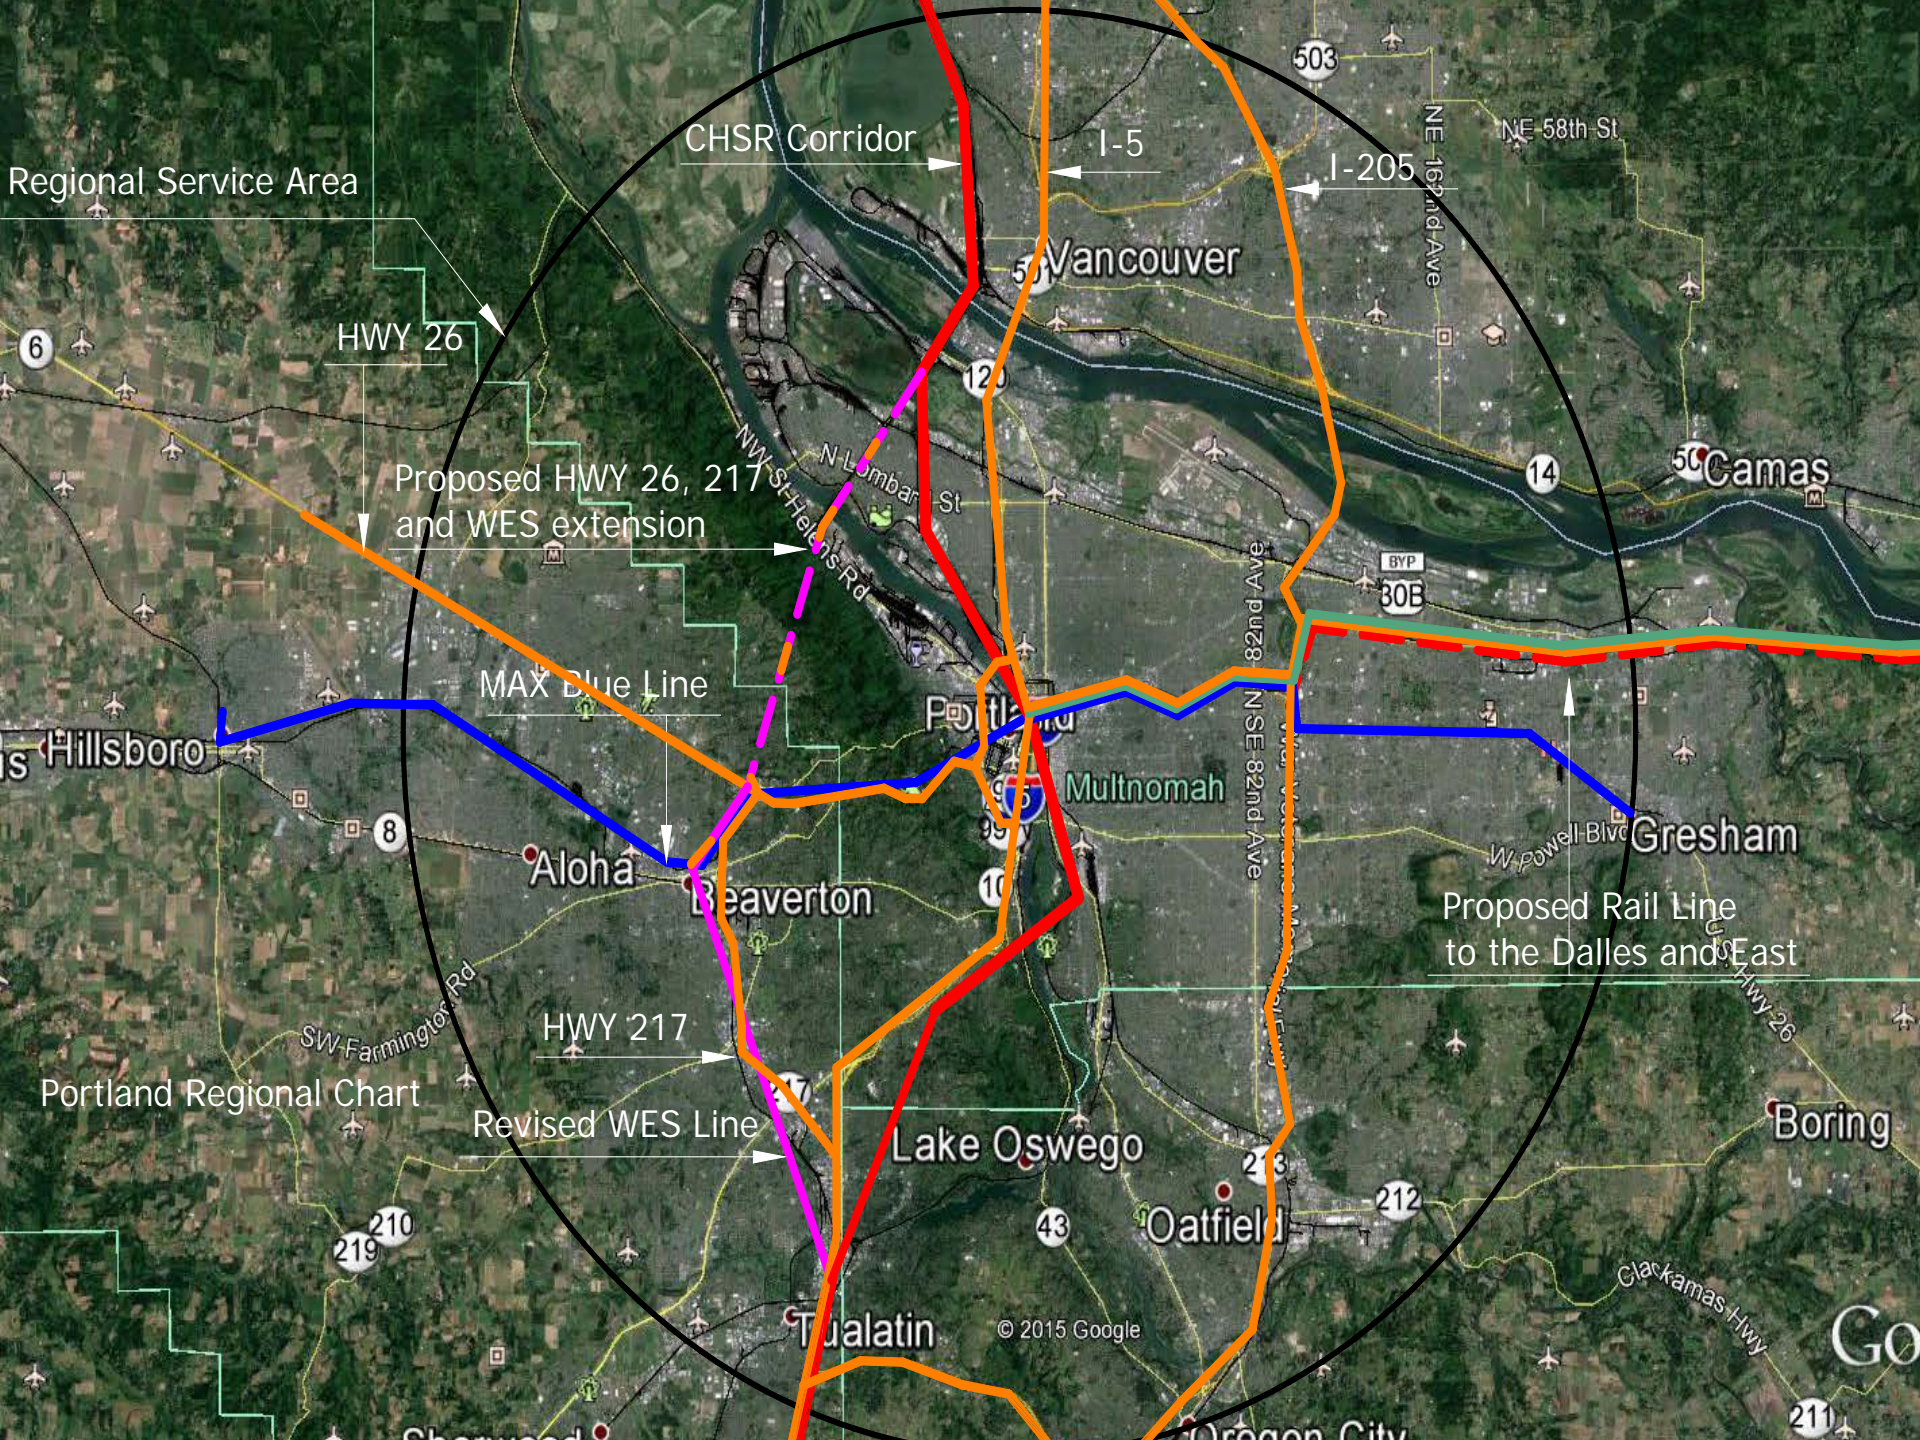

The Portland region has a population of 2.35 million (2015 census)

This region must tackle the transportation problems with a state of art transit plan.

The CHSR and all the commuter lines are electrified corridors with uniform electrical catenary power voltage and frequencies. (V - Hz or cycles)
